

Get the right data. Make better DeFi investments.

We are tracking the performance of the Top 50 tokens and their staking and lending opportunities. Besides performance data, we provide risk and essential descriptive metrics for each asset. Data on liquidity pools is soon to come. All data points including historical data can be accessed via our REST API.

A visual overview is available through our webapp via <https://app.kasuria.io>

Available tokens	BTC / ETH / ATOM / CRV / USDC / etc. (top 50 by MCap)		
Available metrics	Staking (native)	Lending	Descriptive
